

WRITE-IN ELLEN KOPLIN

for

Lower Milford Supervisor

Lower Milford residents' biggest threat has been the Geryville Materials quarry onslaught. For 21 years your Township Government has been fighting the Quarry. From day one, as Township Manager, Ellen worked closely with our Solicitor and Engineers preparing the case for why the Quarry is a health and safety threat for all of our residents. Ten Supervisors over the 21 years ALL saw the dangers and knew the fight had to continue, and for 21 years, our Township has successfully defended against the challenges.

Supervisor Candidate Susan LaBrie apparently disagrees. When asked by a resident what her position is on the quarry, she responded that she would need to read through the files. She answered another resident that she would look at the options.

- **The Quarry will not generate revenue for the Township. It will devalue our properties to the point where real estate taxes will need to be raised on all property owners to balance the deficit. Please see Ellen's website for real estate valuation information.**
- **The quarry applicant, Geryville Materials, stated that 400 trucks per day would leave the quarry and travel through the Township approximately every two (2) minutes, operating from 7 AM to 10 PM.**
- **According to PennDOT's latest traffic data, Limeport Pike, in the Village of Limeport, has a daily traffic count of 6,000 vehicles.**
- **Now, add the steady, additional quarry traffic to that number.**

Ellen is the only candidate that has the knowledge, the courage and the experience. She has been fighting for us, let her continue to do what she does best!

Please Join Us and Write In ELLEN KOPLIN Lower Milford Supervisor

As Manager, Volunteer and Supervisor to our local government, Ellen is the only candidate with a proven record of service to our residents. Responsibility to those you serve is the top priority and experience does count.

While the Townships that surround us have welcomed over development, we in Lower Milford have to endure their traffic on a daily basis. It has become intolerable, with vehicles, including large trucks, seeking shortcuts on our country roads. It is time to address enforcement of the traffic laws through independent or cooperative policing.

Information and studies conducted on the detrimental impacts of quarries on communities is readily available on many websites. The Lower Milford Residents Association has a website containing facts and data to share information with our residents.

**If you have any questions, concerns or just want additional information,
please email Ellen at writeinellenkoplin@gmail.com**

Whether preventing through traffic in Tara Lee Estates or completing the paving in Maplewood Estates,
Ellen doesn't stop until the task is accomplished.
